Webinar Series

AQUA-AEROBIC SYSTEMS, INC.
A Metawater Company

AUGUST - DECEMBER, 2024

THURSDAY, AUGUST 29TH | 10:30AM - 11:30AM

“AquaSBR® Sequencing Batch Reactor for Phosphorus Removal”

- Understand the conditions required for ideal biological phosphorus removal in an activated sludge system
- Learn the advantages of a True Batch SBR system for optimum removal of phosphorus, biologically
- Earn (1) Professional Development Hour (PDH)

THURSDAY, SEPTEMBER 12TH | 10:30AM - 11:30AM

“How Peak Wet Management with PCMF Can Help Facilities Meet Wet Weather Challenges at a WWTP or Remote Overflow Site”

- Understand the principles and benefits of peak flow treatment using Pile Cloth Media Filtration (PCMF) in both treatment facilities and remote sites
- See operating data from full-scale PCMF achieving high removal efficiency in removing pollutants during wet weather events
- Learn how peak flow treatment meets regulatory and permit requirements
- Earn (1) Professional Development Hour (PDH)

THURSDAY, OCTOBER 24TH | 10:30AM - 11:30AM
“AquaNereda® Aerobic Granular Sludge Installation Update”

- Identify the operating AquaNereda plants in North America
- Recognize the unique characteristics and performance attributes of the presented case studies
- Describe the general approach to starting up an AquaNereda system
- Understand how performance objectives are achieved during the initial start-up phase and granulation period
- Earn (1) Professional Development Hour (PDH)

THURSDAY, NOVEMBER 14TH | 10:30AM - 11:30AM
“Technology Overview: Aqua MultiBore® C-Series Ceramic Membranes”

- Learn the unique benefits of low pressure ceramic membranes
- Discover the advantages of ceramic membranes
- Understand why ceramic membranes are transforming the marketplace
- Review data from case studies
- Earn (1) Professional Development Hour (PDH)

THURSDAY, DECEMBER 19TH | 10:30AM - 11:30AM
“Introduction to the DualStar™ Combination Aerator/Mixer”

- Understand the versatility with the ability of mixing and aeration with a blower to work in tandem or independently
- Discover the advantages of intermittent aeration/denitrification (fine bubble aeration with a mixer)
- Learn the best applications for the DualStar: activated sludge systems, lagoons, SBRs and plants requiring biological nutrient removal
- Earn (1) Professional Development Hour (PDH)
